Introducing “Envira-Core” Display Board
The 100% GREEN ALTERNATIVE TO FOAM CORE

“Envira-Core”, is a multi-level micro fluted display board developed for the display, graphic, framing and photo markets. Envira-Core was developed to replace foam core with exceptional flatness, higher rigidity, reduced curl & pillowing with printer select white liners for optimum visual appeal. A high quality, low cost alternative with the environment in mind.
